

## MPV for Mobile Price

In this Project, based on the mobile Specification like Battery power, 3G enabled, wifi, Bluetooth, Ram, etc we are predicting the Price of the mobile. This kind of prediction will help us estimate the price of mobiles to give tough competition to manufacturers Also it will be useful for Consumers to verify that they are paying the best price for mobile. Dataset as 22 features and 2000 entries.

The following figure shown the relation between ram and price range with price:

The following figure shown the relationship between columns:
